**White Paper V1**

Published On 02-18-2022

# About Us

YEET Floki is a deflationary Token on the Binance Smart Chain. Stealth Launched February 7th 2022 on PancakeSwap. Every holder of \$YEET earns more \$YEET with every transaction of the token, this includes buys, sells and transfers. As long as you hold the YEET Floki token, you will earn more. We are currently building out a strong community and online presence. The main utility which is still in development will be our token listing platform. A percentage of the advertising revenues will be distributed back to \$YEET holders, and a percentage will be used for buy backs.

# Our Mission

Our mission is to expand crypto adoption, and help new investors find their next potential gem.

# Disclaimer

Read this disclaimer section in its entirety.

This white paper does not constitute or form part of any opinion on advice to sell or any solicitation of any offer by YEET Floki to purchase our token or tokens, or any other crypto asset.

This document is a technical white paper that presents the current status and future plans for YEET Floki and the rest of the YEET Ecosystem.

The sole purpose of this document is to provide information and to provide a detailed description of future plans. Unless explicitly stated otherwise, the products and innovative technologies organized in this document are still under development and are yet to be incorporated. YEET Floki does not provide a statement of quality assurance or affidavit for the successful development or execution of any of such technologies, innovations, or activities described in this document.

# Tokenomics

**Initial Supply** 1,000,000,000,000

**Max Transaction Size** 50,000,000,000

- 2% Holders Rewards: By holding \$YEET you will receive more \$YEET from every transaction.
- 3% Liquidity: On every transaction, 3% is sent to the liquidity pool on PancakeSwap.
- 2% Burn: Simple supply and demand mechanics. Over time there will be less \$YEET available.
- 3% Development: To ensure that the project continues to see progress and success, 3% from every buy and sell is reinvested back into the project. As the project progresses, this percentage is subject to change.

Total Tax = 10% (subject to change after discussions with the community and as the project progresses)

The Tokenomics are subject to change as the project develops further.

# Token Distribution

10% Initial Burn  
10% Team (Vested)  
80% Liquidity

Any Tokens the individual team members own, were purchased at launch with their own funds.

# Ecosystem

The Ultimate goal of Yeet Floki is to create an ecosystem of complementary projects so that holders of YEET can earn in a variety of different ways. These other projects would be on top of the price appreciation of the token itself and the real-time reflections from every transaction. A few things that are in the discussion include but are not limited to a token/coin listing site, dApp tracking, NFT Marketplace, Metaverse Land etc....

A major part of these plans is the token listing site that we will begin working on once enough funds are raised. On this site, new and old projects will be able to list their tokens and advertise their project. A percentage of the revenue will be airdropped to YEET holders in the form of BUSD. Projects or individuals who purchase ads will have the option to pay in \$YEET and will receive a discount for doing so. A percentage of the revenue will also be used to buy back and burn \$YEET. While we would initially start with the Binance Smart Chain, the goal is to move cross-chain (Ethereum, Tron, Avalanche, Cronos etc...). The ultimate goal of this site is to be the top early coin listing and voting platform.

# Road Map

Nothing on this roadmap is set in stone. Everything is subject to change but we would love to accomplish things much sooner than expected.
